exe file can be used by Motorola technicians to program the radio from a Windows computer. The CPS .exe will also work with the Motorola RVN3410 Programming software. The CP125 comes with the free FMLN650, a notebook program, for easy access to the programming instructions. It can work with the following RF protocols: ..., and. Comparison to software References Category:Radio-frequency identificationQ: Copying all characters from char array to int array I'm trying to copy the characters of a char array to an int array but I'm getting an error. The error says that I need to use memcpy to copy the data. char str[50]; int numbers[50]; for(i = 0; i for(i = 0; i numbers(str, str + 50); or std::vector numbers(std::begin(str), std::end(str)); Q: How to get all parent nodes when calling Google Drive API method GetFolders()? I would like to get all the parent folders in the API by using the method GetFolders() on a folder. This works fine. However, I also want to get all of the folders' children that are in the parent folder (so 82157476af
